- Conducted unit testing and resolved bugs to ensure application stability.

TECHNICAL SKILLS

Main:

- **JavaScript** (Advanced)
- TypeScript
- jQuery
- **HTML5**
- **CSS3**
- SASS
- Bootstrap
- **Angular**
- **React.js**
- NoSQL (**Mongo**) DB
- SQL DB
- **Node.js**
- **Express**

Others:

- python
- C
- Design Patterns
- UI/ UX
- PWA
- Unit testing
- Problem solving
- Cloud Platform.
- Source coding
- Bundling tools (webpack, gulp)
- Version control
- Data structures
- Network
- OS
- Clean coding

SOFT SKILLS

- Excellent communication skills
- Strong presentation skills
- Experience working in agile environments

PROJECTS

E-COMMERCE:

Developed a method of buying and selling goods and services online with features such as email validation and image uploading.

Technologies used: Node.js, Angular, MongoDB, HTML5, and CSS3.

Link: [\[link\]](#)

KIDS SUDOKU:

Developed a Sudoku game to improve skills for kids with a cool interface.

Developed with vanilla JS, HTML5, and CSS3.

For educational purposes only and to be developed in problem-solving.

Link: [\[link\]](#).

BOBAZONA:

Developed a web for drinking services located in the USA, in two phases (Freelance).

Phase 1: involved designing the web interface, SEO strategies, making it responsive, and displaying different franchises and the menu (Figma, Angular).

Phase 2: is in progress, with the concept of making the customer order from home with payment methods, and the order will be directed to the nearest franchise (Node.js, Angular).

Link: [\[link\]](#).

NURSERY SYSTEM:

Developed a backend for a nursery system that contains classes, teachers and children.

Technologies used: Node.js, Docker.

Link: [\[link\]](#).
